

**Please take a moment to read this letter, which outlines branding, labeling and related changes for our Advanced Bioprocessing product line**

August 21, 2019

**RE: Branding, labeling and related changes to Advanced Bioprocessing products, now part of the Thermo Fisher Scientific portfolio**

Dear Valued Customer,

In October 2018, Thermo Fisher Scientific (Thermo Fisher) acquired the Advanced Bioprocessing product line from Becton, Dickinson and Company (BD). In March 2019, we announced changes to how orders must be placed for these Advanced Bioprocessing products, beginning April 22, 2019. Today, we would like to share a change in branding for this Advanced Bioprocessing portfolio.

**Starting September 2019, Thermo Fisher will begin to re-align Advanced Bioprocessing products to our complementary cell culture portfolio under our existing Gibco™ brand. Below are the details of this brand transition, which we will be implementing over time.**

**BRANDING**

We are updating the branding of Advanced Bioprocessing products on packaging, shipping boxes, labeling, certificates of analysis, safety data sheets, marketing materials and on thermofisher.com. In particular, the BD name and logo will be replaced with the Gibco name and logo as shown below.

**New Branding**

**Gibco™ Cell Culture for Bioprocessing**

Backed by technical and regulatory expertise, Gibco cell culture products and services help increase speed to market and have been adopted into the process of hundreds of commercialized biologics

**Newly aligned product lines include:**

- Bacto™
- Difco™
- BiTek™
- Recharge™
- Resurge™

*Difco™ is a trademark of Becton, Dickinson and Company and is used under license.*

When these changes commence in late September 2019, there will be a mix of existing packaging and new packaging as we deplete our current product inventory. You can rest assured there are no changes to product formulations or quality, and all products will remain completely traceable.

**PRODUCT LABEL STATEMENTS**

We are harmonizing and updating the intended use statement on labeling, certificates of analysis, safety data sheets, marketing materials and thermofisher.com to one of the following statements:

- *“For Research Use or Further Manufacturing. Not for diagnostic use or direct administration into humans or animals.” (for catalog products)*
- *“Caution: For use as a raw material in further manufacturing applications.” (for custom products)*

When these changes commence in late September 2019, there will also be a mix of existing product label statements and new product label statements as we deplete our current product inventory. Again, please rest assured that there are no changes to product quality or formulations.

**PRODUCT OWNERSHIP ENTITY**

- We are updating the product ownership entity and address on labeling and certificates of analysis. In particular, the entity name will change from BD to Life Technologies Corporation, which is a subsidiary of Thermo Fisher, for all products manufactured in Miami as shown below. See **Exhibit 1**

for examples of existing and new labels and certificates of analysis for products manufactured in Miami and **Exhibit 2** for a list of impacted SKUs.

**Life Technologies Corporation  
50 NW 176 Street, Miami FL 33169**

We are also updating the entity on labeling and certificates of analysis for products that continue to be contract-manufactured by BD (7 Loveton Circle, Sparks MD 21152 USA) for Thermo Fisher. In particular, the entity name will change from BD to Life Technologies Corporation to reflect current product ownership as shown below. See **Exhibit 3** for examples of existing and new labels and certificates of analysis for contract-manufactured products and **Exhibit 4** for a list of impacted SKUs.

**Manufactured for Life Technologies Corporation  
920 Henry St, Detroit MI 48201**

There is **no change to the manufacturing site, location, processes, finished product release testing or quality specifications for Advanced Bioprocessing products**. There are also no changes to how you transact business with us as a result of this product ownership name change.

### **CERTICATES OF ANALYSIS**

We are updating the certificates of analysis for all Advanced Bioprocessing products to align with Thermo Fisher guidelines. In particular, the legal entity will change to Life Technologies Corporation for products manufactured in Miami and for contract-manufactured products. While you will also notice a new layout, there are no changes to product quality attributes or limits. Please note that all certificates of analysis will remain available on thermofisher.com.

### **BAR LOCK ZIP TIE**

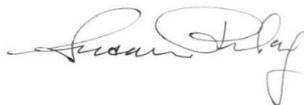

We are changing the color of bar lock zip ties from blue to red. However, there are no changes to the size, dimensions or material composition of the bar lock zip ties that you currently use today.

### **OTHER LABEL CHANGES**

In addition to the branding, regulatory/hazard statements and legal entity changes noted above, new labels will include the thermofisher.com website, harmonized symbols for temperature and storage condition (where applicable), and two-dimensional (2D) barcodes. Contract-manufactured products will still have linear barcodes, plus an additional small 2D barcode. Please note we will submit label changes for OEM/custom/special products for pre-approval prior to implementation.

Thank you for the continued opportunity to serve your bioprocessing needs.

Sincerely,

Susan Riley  
Vice President and General Manager  
Advanced Bioprocessing

Diana Noguera  
Senior Quality Manager  
Advanced Bioprocessing

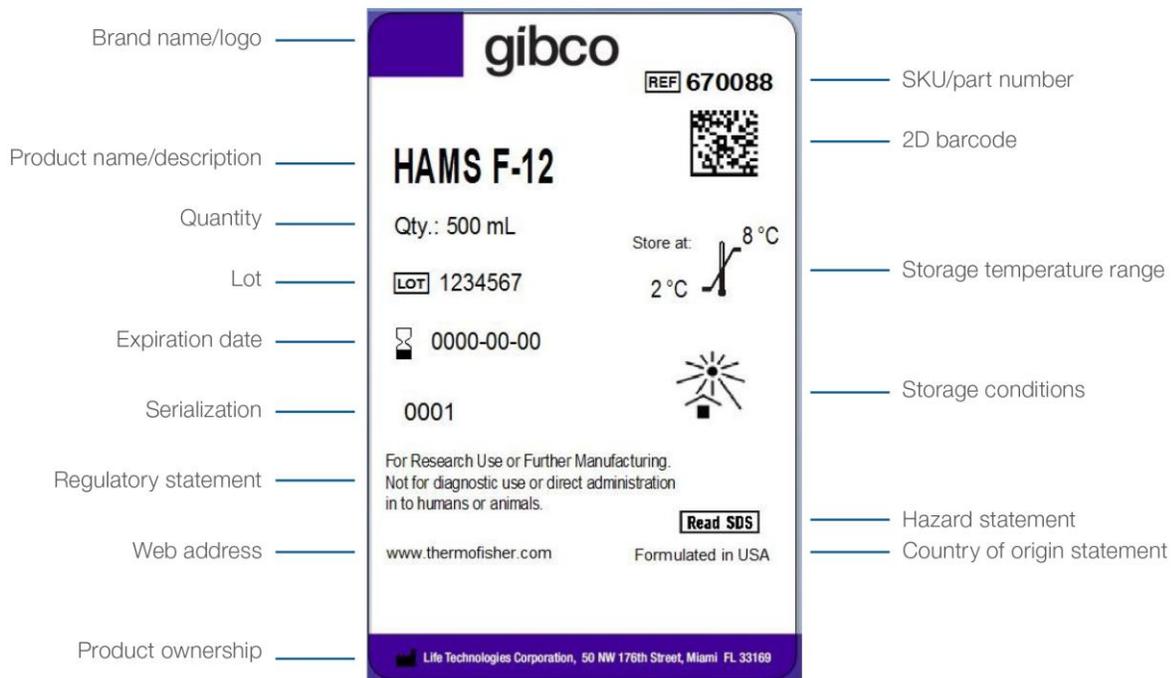

## Exhibit 1: Examples of Labels and Certificates of Analysis for Products from Miami

**Disclaimer: Examples are for illustrative purposes only**

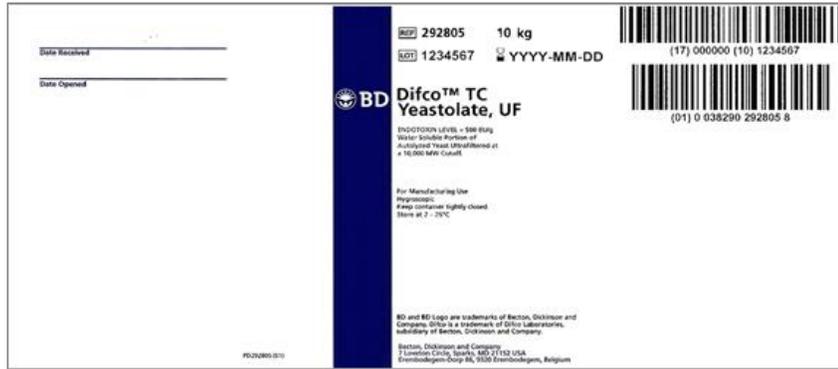

### Example of an existing catalog liquid product label

### Example of a new catalog liquid product label

### Example of an existing catalog powder product label

### Example of a new catalog powder product label

### Example of a new custom liquid product label

Brand name/logo — **gibco** REF 123456 — SKU/part number

Product name/description — **Custom Product Name** — 2D barcode

Quantity — Qty.: X unit of measure — Store at: 8°C — Storage temperature range

Lot — LOT 1234567 — 2°C — Storage conditions

Expiration date — 0000-00-00 —

Serialization — 0001 —

Regulatory statement — **Caution: For use as a raw material in further manufacturing applications.** — Hazard statement

Product ownership — Life Technologies Corporation, 50 NW 176th Street, Miami FL 33169 — Formulated in USA — Country of origin statement

**Read SDS**

### Example of a new custom powder product label

Quantity — Qty.: 10Kg — Lot — LOT 1234567 — Expiration date — YYYY-MM-DD — SKU/part number

Product name — **gibco** REF 123456 — 2D barcode

Product name — **Custom Product Name** — Storage temperature range

Storage conditions — Text section as applicable — Storage conditions as applicable — Example: Hygroscopic — Keep container tightly closed. — Hazard statement

Regulatory statement — **Caution: For use as a raw material in further manufacturing applications.** — Country of origin

Product ownership — Life Technologies Corporation, 50 NW 176th Street, Miami FL 33169 — Formulated in USA

**Read SDS**
