

CMP[®] Mycobacteria culture media

Tuberculosis infection has been for many centuries one of the most important human infections. To find out the pathogen and give the right treatment are the best ways to prevent spreading of tuberculosis. Creative Life Science is committed to provide the highest quality mycobacteria culture media such as Lowenstein-Jensen (LJ) Agar Slant, 7H10, and 7H11, which are commonly used for isolation and cultivation of *Mycobacterium* spp.

Features:

Quality is stable and reliable.

Encourages the earliest growth of mycobacteria.

Large colonies are easily distinguished.

LJ agar slant is only 113 mm tall, which is easy for colony picking.

Item Description	Catalog No.	Specification
L-J Agar Slant	CMP0200862	20x113 mm, 100 EA/BOX
Middlebrook 7H10 Agar	CMP0102881	90 mm Mono, 40 PC/BOX
Mycobacteria 7H11 Agar	CMP0101251	90 mm Mono, 40 PC/BOX
	CMP0101252	90 mm Mono, 100 PC/BOX
